HART SENATE BUILDING MAIL TREATED HERE

(LIMA, OH) – One truckload of mail from the Hart Senate Building in Washington, D.C. was processed in Lima Friday for irradiation treatment at the Titan Scan Technologies facility on 4th Street.

The mail was packaged in accordance with the previous protocols followed when 47 truckloads of mail from the Brentwood postal facility were sent here for irradiation last fall. The Federal Bureau of Investigation had quarantined the mail in Washington after a letter to Senate Majority Leader Tom Daschle was discovered in October. The truck left Lima enroute back to Washington early this morning. There were no incidents or problems with this truckload.

Routine *preventative treatment* of high profile Washington, D.C. mail will resume this afternoon.
